

BI-DIRECTIONAL ILLUMINATION FROM  
A RING WITH AN INNER RING THAT  
CREATES A SOFT GLOWING EFFECT

### Features

- Diameter:** 24" to 144" (nominal)
- Output:** 56 LPW
- Housing:** Aluminum
- Mounting:** Pendant or surface
- Driver:** Inside canopy or remote
- Weight:** 3 lb/ft (based on Ø)
- Certification:** UL listed for damp location use
- Warranty:** 5-year limited warranty
- Photometry:** Third-party photometric report and IES files on the website

- Rings up to 72" diameter ship in one piece
- Mounting option for multi-ring clusters
- RGB+W in standard lumen output range
- Acoustic options available

## LED

**SO** Standard output static white LED is equal to the delivered lumens for model listings defined in the table to the right. Standard white LED choices are 3000-4000 °K. Consult factory for additional options within range 2200-6500 °K.

**HO** High output static white LED is equal to the delivered lumens for model listings defined in the table to the right

**MD** Modify output within standard range in 5% increments up to 543 lm/linear ft.

**TW** Tunable White is programmable between 2700-6500 °K

**WD** Warm Dim ranges between 2200-3500 °K

**RGBW30 | RGBW35 | RGBW40** RGB + White LED lumen output is the same as static white LED as shown in the table

(consult factory for MD, TW, WD, and RGB+W options)

## Driver

Drivers are integral, Class 2 constant current, Universal and include two-wire 0 - 10 V dimming, 1-100%.

Delivered lumen output values can be programmed to lower values than shown in 5% increments.

Consult factory for DMX commissioning with RGB+W and for DALI dimming control options.

Remote and backup battery options are available (p.8).

### Standard Mounting

#### SPC (single point canopy)

Rings are suspended with straight, 100" field adjustable aircraft cables individually attached to single point Ø2" non-power canopies and a power feed canopy.

Consult factory for custom mounting options

### Standard Mounting

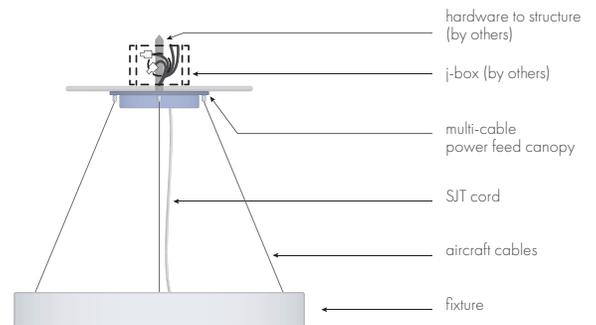

#### MCC (multi-cable center canopy)

Rings are suspended with multiple angled, 100" field adjustable aircraft cables attached to a central power feed canopy. Cable angle should not be greater than 45° (see diagram).

Consult factory for ring diameters greater than 96".

### MRC (multiple ring cluster)

Elegant rings dynamically suspend from a central custom canopy in custom, eye-catching arrangements. 100" field adjustable aircraft cables allow for on-site angle adjustments.

Consult our factory for required submittals.

### MCC-POC (power-over-cable)

We use a powered suspension system to suspend and power Class 2 LED lighting fixtures with a thin cable, providing a refined, modern look without the need for a separate power cord.

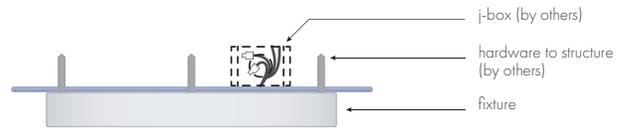

The number of PoC cables on each ring depends on fixture size and lumen requirements. Consult factory for required submittals.

The diagram to the right illustrates MCC-PoC. Consult factory for SPC-PoC and MRC-PoC.

### SRF (surface mounted)

Luminaire is fastened flush to mounting structure.

Powder Coat (color match)

Wood Grain (covers inner and outer walls)

Vinyl Skin (covers inner and outer walls)

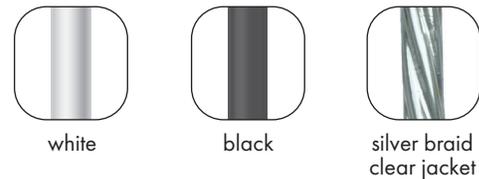

## Canopy | Cord Finish

Canopy finish options include powder coat in standard or custom colors. When RAL or custom colors are applied to fixtures, canopies may be custom finished to match. 4-digit RAL color code or color chip must be provided.

While choosing a canopy finish, choose a power cord color.

## Options

### RMT (remote driver)

Remote driver is mounted to an aluminum plate (by Lumos) to be placed inside an electrical enclosure (by others).

The diagram to the right illustrates single point canopy mounting (SPC) with remote option (RMT).

### RMT-BBU

Emergency backup battery is connected to each driver, which operates for 90 minutes. Test switch and LED indicator included. When RMT-BBU is selected, batteries and drivers are mounted to an aluminum plate (by Lumos).

DIM, DIM.1, DALI drivers are rated 120-277 VAC; TRIAC/ELV drivers are rated 120 VAC.

### Acoustic Options

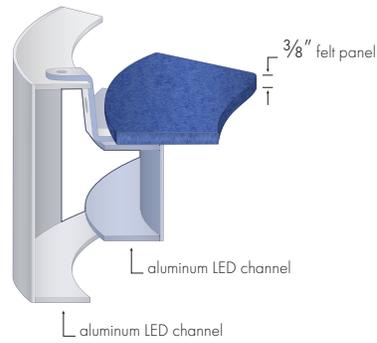

Our rings can be transformed into acoustical absorbing luminaires to help reduce sound reflections and reverberations in a room. Design options combine light with acoustical absorbent felt to improve the overall sound quality and appearance of a space. The felt absorbs sound waves, reducing echo and enhancing speech intelligibility, while the light source provides illumination.

### Panel

Durable 3/8" thick felt panel centered in ring. Made from 60% recycled PET fiber with NRC .30.

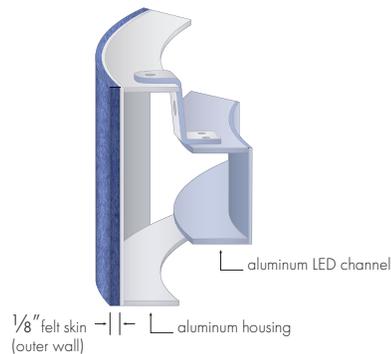

Panel absorber can be combined with Skin absorber.

### Skin

Inner and outer walls of ring are covered with 1/8" thick felt made from 100% post-consumer recycled polyester fiber with NRC .70.

Skin absorber can be combined with Panel absorber.
