MRC (multiple ring cluster)

Elegant rings dynamically suspend from a central canopy in custom, eye-catching arrangements (MRC options require factory submittals; consult factory.) Field adjustable AC cables allow for on-site angle adjustments. Delivered with 100" adjustable cable(s) standard.

MCC-POC (power-over-cable)

We use a powered suspension system to suspend and power Class 2 LED lighting fixtures with a thin cable, providing a refined, modern look without the need for a separate power cord. Delivered with 100" adjustable cable(s) standard.

The number of PoC cables on each ring depends on fixture size and lumen requirements. (consult factory for required submittals)

The diagram to the right illustrates MCC-POC (consult factory for SPC/MRC-POC).

Acoustic Options

Our rings can be transformed into acoustical absorbing luminaires to help reduce sound reflections and reverberations in a room. Design options combine light with acoustical absorbent felt to improve the overall sound quality and appearance of a space. The felt absorbs sound waves, reducing echo and enhancing speech intelligibility, while the light source provides illumination.

Panel

Durable 3/8" thick felt panel centered in ring. Made from 60% recycled PET fiber with NRC .30.

Panel absorber can be combined with Skin absorber.
